The screenshot shows a desktop environment with a blue and white striped background. On the left, there are icons for 'A.N.N' and 'Notes'. The 'Notes' application is open, showing a single note with the text 'this is a test note'. The main window is a web browser titled 'A.N.N - Anonymous Node Network' with the URL 'http://2064199b3e567e8092209b820eef408.ann'. The browser displays a website with a dark forest background. At the top of the website is a red logo of a creature and the text 'THE LOOGAROO'. Below the logo is a person in a white robe standing in a dark forest. At the bottom of the website, there is text that reads: 'WE ARE THE SONS AND DAUGHTERS OF THE LOOGAROO, OUR BELOVED MOTHER. Long ago, our great mother made a pact with the merciful Lucifer. This pact was made in order for her to continue to serve us, her family. We have been around for centuries in the shadows of the cruel mankind. We are the ones who stalk the night, the ones who you feel behind you while you walk alone.'

It's better than most sword fighting weapons I see.

The price is not expensive. I support you.. a good time for you and your friends, locally, online.

the soundtrack rocks.

! highly recommended !

. Pretty good, I only can recommend it for people with 3d tho. 3D (I'm using Nvidia's) is awesome with this game (5 to 15 percent trust me on this) really wish their was a middle of the road button for these reviews..... I would have recommended this game as positive, but it got stuck on collecting wooden pieces on the pier. No matter how many times I went back and forth or tried to click to collect the wooden piece, it would not allow me to do so and therefore I could not continue with the game and therefore I cannot recommend this specific play. Having said that - up to this time the game was good and I enjoyed the fact that you had to collect your 'hints'. It was more challenging therefore.. I honestly don't know what people hate about this game. I feel like it has some major potential. While the game doesn't feel finished, it does feel like a decent racing game. I get that there are no licensed cars, but it doesn't really matter if you aren't a car fanatic. My only problem is the physics. They aren't realistic at all. I spin out at random times, even when I shouldn't. Overall, it is an okay racing game. (B-). I love this game, it's a great and fun spin on tower defense and it kills me to have to leave it negative review, however Aksys leaves me little choice. They have a dead/unmonitored fake customer support email that as of this review has been nearly 1 and a half months since I requested help and if they were aware of the PC issues of this port, to get absolutely no response whatsoever.

I contacted Steam to get a try to flush your cache etc. did all that still no fix, steam's final answer, "we apologize but since valve didn't make it there's nothing we can do."

Which I think they could, as in keeping trash off steam that's abandoned and unsupported. This is a fairly new game it's not like it's a Good Old Game with the dev/pub out of business etc. Even then GOG will refund in full up to 30 whole days if your issue is unresolvable, but back on topic. I tried looking up the dev to contact for help but they only have Japanese sites unless you read and write fluent Japanese you won't get much there. So you've been warned, Aksys is a trash scum company that has no support and does not support any product they dump on us so do not give them your business.

They have a lot of nerve to waste 20 seconds of my life every time I boot up this game warning me about privacy and how it hurts everyone. No. Your dump it, forget it, ignore the customer does far, far more damage. Aksys is now on my never buy from again list.. I really wanted this game to turn into something good, but it didn't. It's very poorly made and sorry devs, but you don't seem to know a lot about the weapons you put in the game. lol I almost crapped my pants when one of your guys said he's an Army or Marine vet or something, and had no idea how the MK18 should operate mechanically. You had a cool concept, but I'm afraid you blew it.. Absolutely love this game! The art style is original, the combat is fun, it's very humorous, and the length is perfect! Play it!. Trump wants my wall please help

it's not working :(

. Tedious.... boring and painful. I played this game at my freind's computer and decided to get it for myself

If you like tycoon games get it, at least to support the developers this game in the right path to become a really great tycoon game.

Yes it's still in early access but it has plenty of gameplay and based on the announcements the developer seems to be working to add more and more features. I also cheked out the developers twitter account and they recintly posted an update on a new UI which looks amazing.

Also a really great thing is that the developers are very resposive. I messaged them through email and I got a response in less than 12 hours that's really cool from them.

I'm really exited to see where this game is going.. this game is so bad, good thing i got it 75%, off complete waste of time. needs more maps and powerups...

good enough tho
