Q: Possible to use an old.dvd.creator.v2.5.0814 patch instead of the patch suggested by the above tutorial? The newest version I have can't support M1... Can I just use the Release version 4 instead of the Release 3? (for what I have read in the tutorials is that release 3 can't be installed in an os that is compatible with v4, and release 4 can be installed into v3, but I might be wrong)

[Q]: Are there any problems with downloading the released version for v4? I did the steps explained on the tutorial and it didn't have any errors. I also have Windows 8.1.
